Linking Moodle to Lecturecast

To make Lecturecast recording available to students, staff will need to link their Moodle courses to the relevant Lecturecast section. A new Moodle block has been created which allows this to be done.

Lecturecast content is typically accessed via Moodle courses. This means that Moodle-to-Lecturecast course links must be set up before staff and students can access Lecturecast content.

The training guides in this section provide step-by-step instructions for mapping a Moodle course to a Lecturecast section and adding a link to a Lecturecast section.
