Snapshot

**Important**
See the [Summer 2019 upgrade wiki page](http://bit.ly/CCAttr3) for information on the 2019 snapshot.

**Snapshot**

- About the Snapshot
- Grace period for editing and Hiding content
- Accessing the Snapshot

**About the Snapshot**

The snapshot (previously know as the Archive) is a 'point-in-time' copy of UCL Moodle ([http://moodle.ucl.ac.uk](http://moodle.ucl.ac.uk)) taken for reference purposes. All records present on this date will be included in the snapshot. This includes, but is not limited to, course content, i.e. resources and activities, and stored records, i.e. forum posts, assignments and grades. Modifications are made to ensure staff and students are moved into read-only roles. Students can view content but not take part in any two-way activities (quizzes, forums, assignments etc). While this retains most of their respective functionality, it prohibits further editing or changes to course content, grades and enrolments. The purpose is to retain an accessible digital record of each course for students and staff. Courses will be kept in the archive for up to seven years. The snapshot is available for all members of the UCL community who have a valid UCL username and password. The level of access to the snapshot reflects the level of access on the day the snapshot was taken, so if a student was enrolled on a suite of courses when the 13/14 snapshot was taken, they will have access to the same courses (albeit read-only) in the 13/14 snapshot instance of Moodle. Guest access is not enabled in the Moodle Snapshot.

Please note - the snapshot does NOT reset your course or affect the student data on your course in any way. Course resets are a manual process that you will need to do when preparing your Moodle course for the next cohort.

**Grace period for editing and Hiding content**

It may be undesirable for all of your course content to remain available to staff and students on the archive. There is an initial one month editing grace period after the Snapshot is taken, for staff to make parts of a course, or an entire course invisible. We advise all staff check courses and hide content they do not want available such as:

- **Resources** - resources which are released in a timely way, such as answers to assessments
- **Quizzes** – summative exams
- Any other content

**To hide individual items:** Turn editing on, click on the 'Edit' dropdown and then click the eye icon to hide each item. Hidden content will appear with grey shaded box around it.

**To hide an entire topic area:** Turn editing on and click on the eye icon to the right of the topic area you want to hide. This will close the eye

and the topic will show greyed out with a dashed border.

**To hide the entire course:** In the **Settings** menu, under **Course administration** click on **Edit Settings**.
Set Availability to ‘This course is not available to students’ and click Save changes.

**NOTE:** If you have used the time limited restriction feature in your live Moodle course for any activity or resource, these dates will apply in the archive too:

<table>
<thead>
<tr>
<th>Restrict access</th>
</tr>
</thead>
<tbody>
<tr>
<td>Allow access from</td>
</tr>
<tr>
<td>Allow access until</td>
</tr>
<tr>
<td>Grade condition</td>
</tr>
</tbody>
</table>

If you would like these resources or activities to be hidden permanently in the archived version of your course, please ensure you have removed the date restriction and hidden them permanently (using the icon) before snapshot weekend.

**Accessing the Snapshot**

The different yearly Snapshots can be viewed here: [http://moodle-snapshot.ucl.ac.uk](http://moodle-snapshot.ucl.ac.uk)
