

What is the CLOSER Technical Wiki

Welcome to the CLOSER technical wiki, these pages aim to provide information for both CLOSER Discovery users and technical users. CLOSER Discovery users will find detailed information which will aid the use of the search engine. Pages of interest are:

- [CLOSER Discovery](#), which provides an introduction to the search engine.
- [Known Issues](#), which flags any significant issues relating to CLOSER Discovery which we are aware of.
- [Topics](#), which describes the defined list of terms used to categorise the questions and variables in CLOSER Discovery.

The wiki also provides technical information about the software and standards used to generate CLOSER Discovery and provides procedural guidelines for the process involved in metadata production which others can follow.

The content in the wiki is continuously being updated and improved. If you have a query about the content of the wiki please email closer@ucl.ac.uk
