

M17 - Question Bank

Keywords: quiz, question, import, multiple choice, short answer, text, essay, feedback, self-test, evaluate, categorise, questionbank, sort, find, auto-allocate, auto-generate, random quiz question

What is it?

Questions banks enables quiz questions to be created, previewed and edited in a database of question categories. The questions in a category can be added to a [Quiz](#) or to a [Lesson](#) activity via an export process.

Why use it?

Using quiz question categories allow you to more easily find and re-use your questions across Moodle courses and within separate quizzes.

Who can use it?

Tutors and course administrators can create quiz categories and questions.

Before I start...

Determine what categories make sense for finding and re-using quiz questions within your course. Categories may also be used to allocate random-quiz questions within a formative quiz. This feature is not recommended for credit-bearing (summative) assessments, as allocating different quiz questions to different students could be deemed as unfair and may be challenged by students.

How do I set one up?

The teacher enters the question bank by creating or editing a quiz activity or via Course administration > Question bank.

You can then [follow the instructions for adding quiz questions](#).

Further help

[Further guidance on Question bank is available from moodledocs](#).

If you find any inaccurate or missing information you can even update this yourself (it's a communal wiki).

If you have a specific question about the tool please [contact the Digital Education team](#).
