Study Tools

As part of their connected learning internship, a student has created several study tools in Excel which aim to ease tracking your assessments and learning. Personalised spreadsheets are available for each degree programme. An instructional video on how to use the sheets is also available via Stream.

Undergraduate programmes
- BSc Computer Science
- MEng Computer Science
- MEng Mathematical Computation

Postgraduate taught programmes
- MSc Computer Science
- MSc Computational Finance
- MSc Computational Statistics and Machine Learning
- MSc Computer Graphics, Vision, and Imaging
- MSc Data Science and Machine Learning
- MSc Disability, Design, and Innovation
- MSc Emerging Digital Technologies
- MSc Financial Risk Management
- MSc Financial Technology
- MSc Information Security
- MSc Machine Learning
- MSc Robotics and Computation
- MSc Software Systems Engineering

UCL Study Skills Hub

The UCL Study Skills Hub brings together a range of academic support resources to help students develop their academic skills. This includes personal development and goal-setting, academic skills development (including time management and academic writing), academic communication, library skills, digital skills, and advice for success in final year projects.
