Section 12 Progression, Award, and Classification

Navigation:

- 12. Progression, award, and classification
- 12.1. Progression and award requirements
- 12.2. Classification requirements

12. Progression, award, and classification

Information on how a student progresses through the programme, including what a student needs to complete and pass to be awarded a degree; what are the consequences of unsatisfactory progress.

12.1. Progression and award requirements

Information on how a student progresses through the programme; what does a student need to complete and pass to be awarded a degree.

A programme's progression and award requirements define how many credits (and at what levels) students need to pass in order to progress from one year of study to the next (in the case of undergraduate programmes) and to be awarded a UCL qualification.

The regulations work slightly differently depending on the programme’s structure. Specific regulations for your programme are published in its Programme Summary document (see Section 8: Programme details | CS Student Handbook), which also includes details of any year-specific requirements, non-condonable modules, restrictions on condonement, additional requirements (for example relating to accreditation), and any interim awards available. Specific regulations for your programme will also be published in Portico under 'My Studies'.

Further information:

- Section 8: Programme details | CS Student Handbook
- Section 9: Progression & Award | UCL Academic Manual
- Portico Login | UCL
A classification is a scheme that is used to differentiate levels of attainment of those awarded a qualification. The classification schemes of each of UCL’s qualifications are set out in the Academic Manual (see Section 10: Classification | UCL Academic Manual). Your programme’s Programme Summary document defines whether each of its interim, alternative, and final awards is eligible for classification.

If you meet your programme’s progression and award requirements, you will be recommended for an award. If the award is eligible for classification, you will be awarded a classification according to the programme’s classification scheme. Interim awards (lower awards made where eligible students do not meet the requirements for their final award) are not eligible for classification. Specific regulations for your programme will also be published in Portico under ‘My Studies’.
